Freight

Bob Chappuis

Volatility amplifies the need for transparency and visibility

Carriers

84% of carriers own <4 trucks ⁽²⁾

Small carriers disadvantaged (lack of access to attractive loads)

Brokers

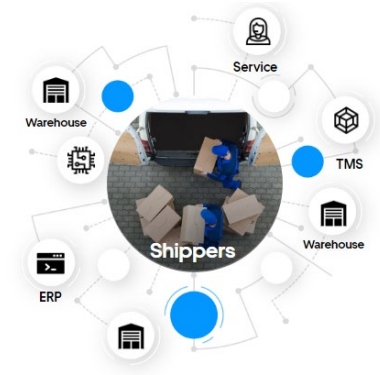

Inefficient capacity sourcing

Significantly fragmented - 17K brokers ⁽³⁾

Shippers

IT fragmentation

>20% of tenders rejected ⁽⁶⁾

Logistics cost ~5% of rev for shippers ⁽⁷⁾

1. American Transportation Research Institute, *Analysis of Truck Driver Age Demographics Across Two Decades* (Dec 2014), 2. Federal Motor Carrier Safety Association (FMCSA); Uber analysis, 3. JOC.com, Taking stock of the the freight brokerage business (September 2017); Transportation Topics, 4. Public company filings; Uber analysis. 5. Freight Cass Index, 6. Freightwaves Sonar, 7. Public company filings; internal analysis, 8. US EPA, Inventory of US Greenhouse Gas Emissions and Sinks, 9. American Transportation Research Institute (ATRI).

We came together to embark on a vision

Planning

First mile

Middle mile

Last mile

To lead the *digital transformation of global logistics* with the most comprehensive *end-to-end logistics platform*

Building
Visibility

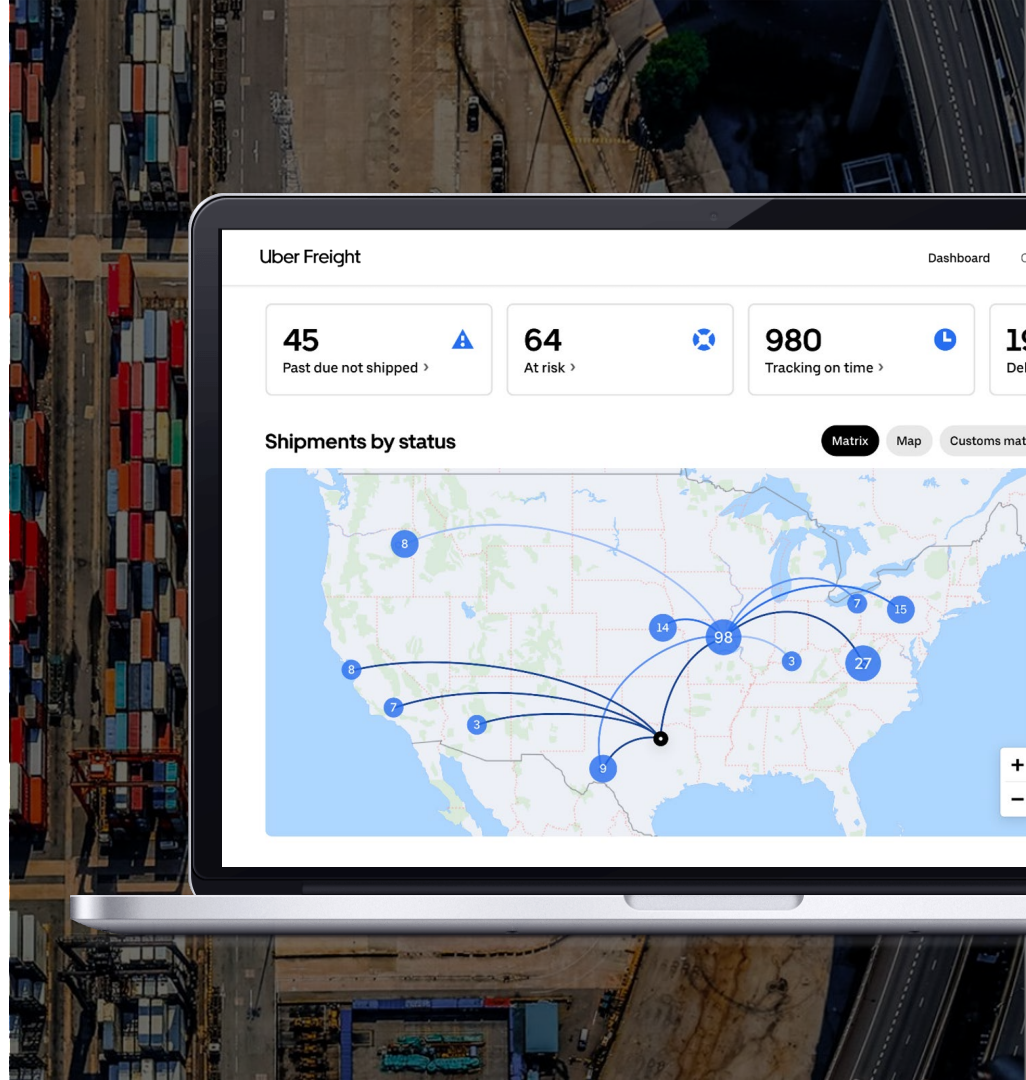

Tracking Tools

Control Tower

Facility Insights

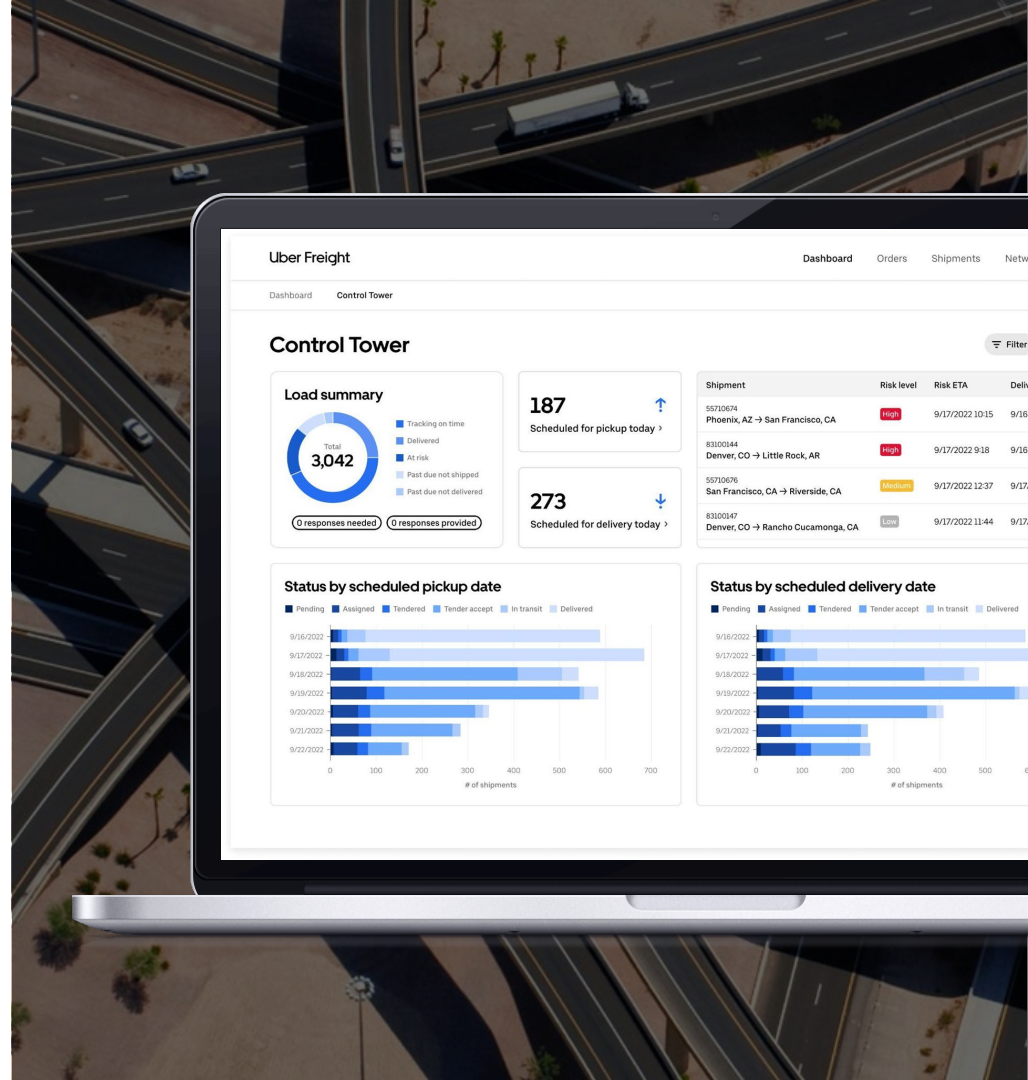

See every order, every mode, everywhere

- Real time tracking for Truck, Less-than-Truckload, Rail, and Ocean
- Enabled using
 - Uber Freight's Carrier App
 - Modern APIs
 - ELDs
 - EDI

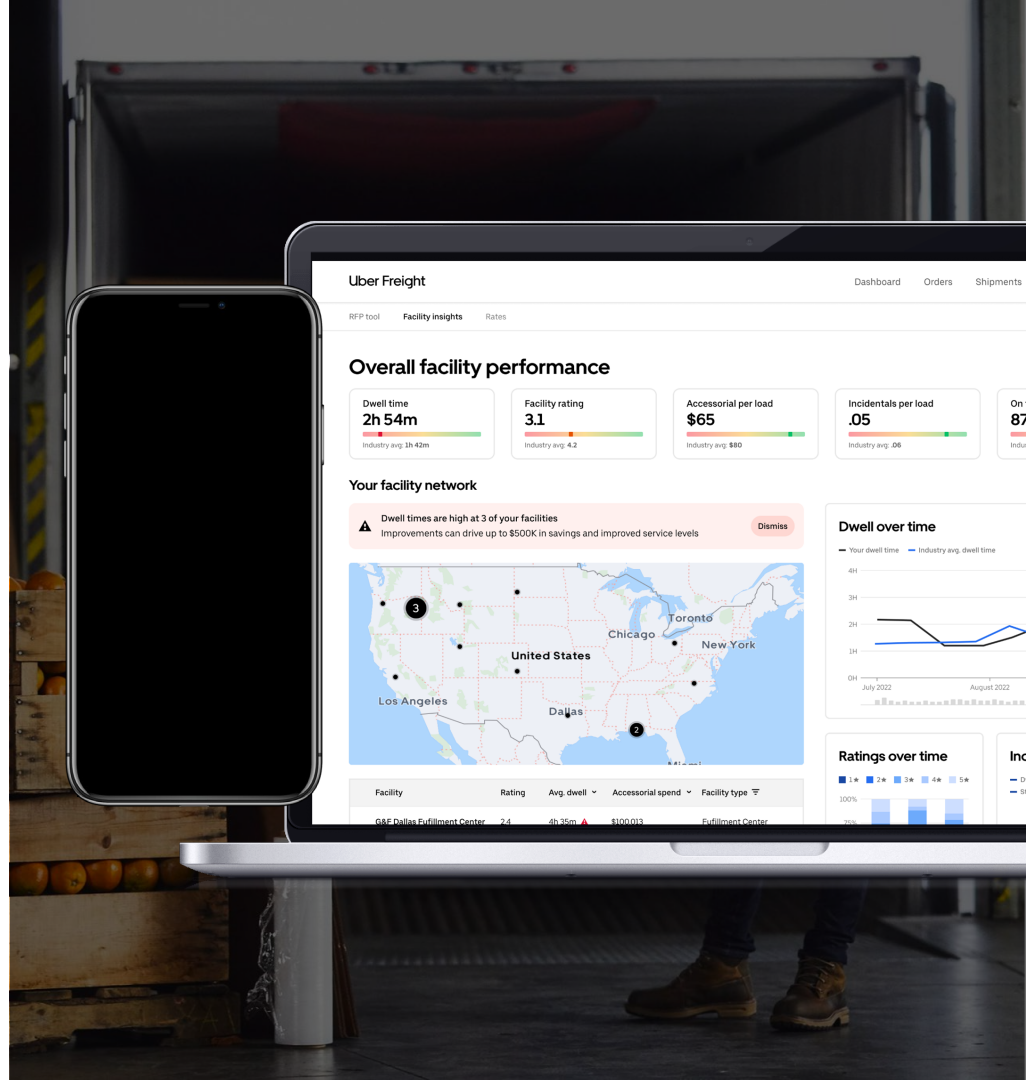

Plan, predict exceptions, act on insights

- Fully customizable dashboard
- Configuration is self-serve; instantly build your view without having to contact the support team
- Share your configuration with others as a template to help speed-up onboarding

Facility data can improve utilization across the network

- High correlation between pricing and facility performance
- Full network view to focus on optimizing network of shipping sites and customer facilities
- Lack of facility data is the #1 contributor to dwell time and wasted capacity
