

project **4+4**

THE **MISSION** SINCE OUR FOUNDING

To eliminate friction from global trade

AUTO

CONNECT

Fuse every carrier,  
system and sensor into  
one living data fabric  
and semantic layer for  
reasoning

SEE

ACT

AUTOMATE

AUTO

CONNECT

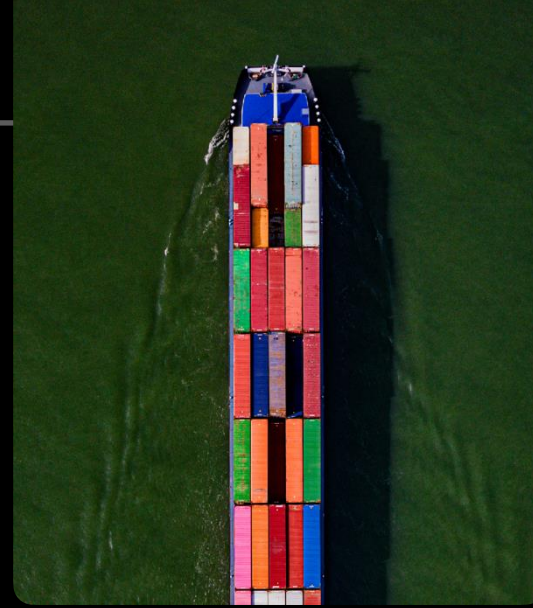

SEE

Transform data into  
AI-powered  
actionable and  
contextualized  
intelligence that both  
recommends and  
assists

ACT

AUTOMATE

AUTO

CONNECT

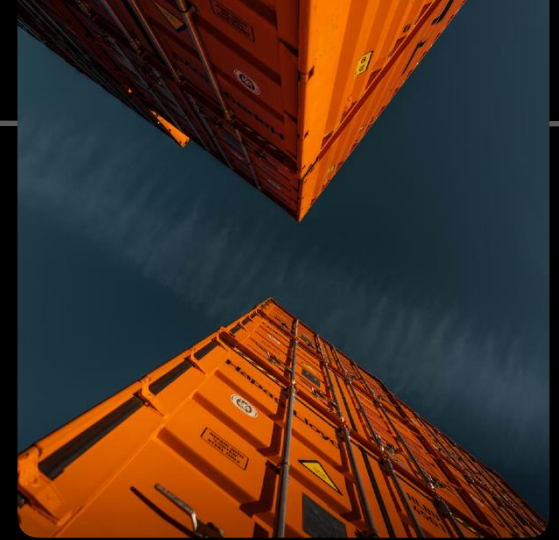

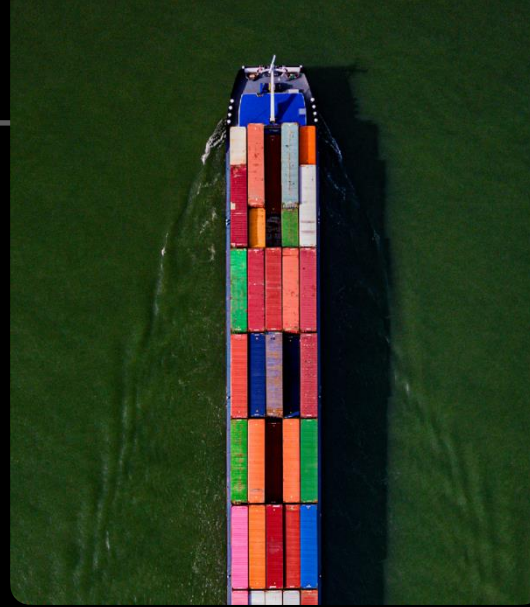

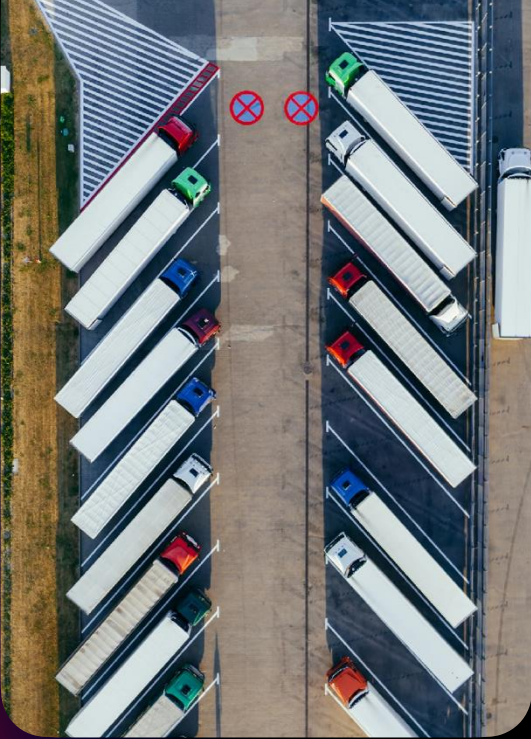

SEE

ACT

AUTOMATE

Deploy agentic systems of work to reduce bias from daily operations and improve velocity

AUTO

CONNECT

SEE

ACT

AUTOMATE

Stitch together  
systems of action to  
automate complex  
multi-agent workflows  
to improve top &  
bottom lines

## Signal

|                    |                   |
|--------------------|-------------------|
| New order          | Capacity opened   |
| Late shipment      | Capacity lost     |
| Status update      | Tender posted     |
| Route change       | Tender declined   |
| ETA drift          | Tender accepted   |
| Check-in missed    | Invoice created   |
| Check-in received  | Invoice approved  |
| GPS ping           | Invoice rejected  |
| Temperature spike  | Payment received  |
| Temperature drop   | Payment overdue   |
| Door opened        | Exception logged  |
| Idle detected      | Risk detected     |
| Speed drop         | Threshold crossed |
| Speed spike        | Sensor offline    |
| Border crossed     | Sensor restored   |
| Stop started       | Message received  |
| Stop ended         | Message unread    |
| Appointment booked | Document uploaded |
| Appointment missed | Document missing  |

## Trigger

|                |                       |
|----------------|-----------------------|
| If new         | If inactive           |
| If delayed     | If off route          |
| If changed     | If on route           |
| If missing     | If outside window     |
| If late        | If inside window      |
| If early       | If unassigned         |
| If over limit  | If reassigned         |
| If under limit | If unmatched          |
| If no response | If duplicated         |
| If confirmed   | If escalated          |
| If rejected    | If unresolved         |
| If accepted    | If resolved           |
| If overdue     | If threshold met      |
| If unread      | If threshold exceeded |
| If repeated    | If confidence drops   |
| If first time  | If confidence rises   |
| If high value  | If priority high      |
| If high risk   | If priority low       |
| If premium     | If location unknown   |

## Action

|                   |                    |
|-------------------|--------------------|
| Send alert        | Release payment    |
| Create task       | Hold payment       |
| Assign owner      | Retry message      |
| Escalate issue    | Trigger workflow   |
| Update ETA        | Start timer        |
| Replan route      | Stop timer         |
| Notify customer   | Pause process      |
| Notify carrier    | Resume process     |
| Notify driver     | Block handoff      |
| Open case         | Allow handoff      |
| Close case        | Reassign load      |
| Log event         | Book appointment   |
| Tag shipment      | Cancel appointment |
| Add note          | Raise priority     |
| Change status     | Lower priority     |
| Request update    | Launch review      |
| Request document  | Run check          |
| Validate document | Refresh data       |
| Approve invoice   | Sync systems       |

# Designed for Trust

**CONFIGURABLE**

Granular control over workflows, execution parameters, and targeting to adapt to diverse operational needs

**EXPLAINABLE**

**HUMAN-  
CONTROLLED**

# Designed for Trust

**CONFIGURABLE**

**EXPLAINABLE**

**HUMAN-  
CONTROLLED**

Transparent logic, audit history, and performance analytics provide clear insight into agent behavior and outcomes

# Designed for Trust

**CONFIGURABLE**

**EXPLAINABLE**

**HUMAN-  
CONTROLLED**

Keep users in the loop  
with approval,  
oversight, and  
intervention at every  
critical step
